LinkedIn: <https://www.linkedin.com/in/pruthvi-shrikaanth-ba065b181/>

2nd Year Computing Student with a passion for developing new tech, a wide range of experience and skills across various projects. Excited to learn and solve complex problems. Special interest in product development, optimisation, machine learning and tool integration.

Web Development | Flutter | Cloud DBMS | Python | Kotlin | C | Project Management

Education

Imperial College London – BEng Computing (2024 – 2027)

Currently on a 1st. Modules of interest include machine learning and neural networks, computational techniques and optimisation, networks and software engineering.

King Edward VI Camp Hill School for Boys (2017 – 2024)

A Levels – Maths (A*), Further Maths (A*), Physics (A*), Computing (A)

GCSEs – eight 9s, two 8s

Experience

Imperial College London – City & Guilds College Union

Full Stack CGCU Site Maintainer (2025 – 2027)

Build and serve union website to 15k monthly viewers, host and fix event portals, support Union operations and management.

Projects

Braille Reader and Teacher

Built pipeline from camera to Claude through OCR, set up frontend interface to train blind students in Braille. Runners up for **Anthropic Award at ICHack 2025**.

Social Simulator and Predictor

Modelled user profiles and created scalable simulation platform for optimised user interactions – curated user feedback for partnerships and social cohesion. Expanded model to encompass B2B systems and clients. **ICHack 2026**.

Peripheral Security System

Created full-stack, client-server system to oversee and manage thousands of personnel. Flexible user policy with real-time alert system with multi-channel and P2P distress signals.
